

Tie dye #1

Pillowcases, apple barrel paint (or similar paint), spray bottles for each color, and rubber bands. Wash pillowcases but do not dry them. They need to be damp for the paint to spread. Twist or knot as you would to tie dye and secure with rubber bands. Using a spray bottle put equal parts paint and water. Shake to mix. If fluid won't pump thru sprayer, add more water. Spray one color or more as you wish. Let dry completely. Undo the bands and finish drying. You can also freehand or splatter paint the cases without rubber bands.
